

## Commercial Litigation

We bring a strategic perspective to insurance coverage litigation, bank litigation, securities litigation, dissolution and shareholder disputes and intellectual property/unfair competition claims. Throughout our history, we have specialized in representing financial institutions, global insurers, privately held businesses and non-profit and professional organizations. Our clients include banks, insurance agents and brokers, closely held businesses and non-profit mutual benefit associations. Our work for banks includes operations litigation matters, loan and commercial paper claims, wire transfer claims and losses arising out of fraudulent documents of title. Our experience in the securities industry ranges from representing directors and officers and professionals in class action litigation to single-investor suitability claims. We also handle non-compete, trade secret and other intellectual property and unfair competition claims.
